Posture at a glance

Transport	TLS 1.2+ everywhere · HSTS enforced
Authentication	JWT access tokens · rotated refresh tokens · bcrypt-salted passwords
Access control	6 tenant roles · platform admin via env allowlist
Isolation	tenant_id scoped on every query · 404 on cross-tenant probe
Storage	Cloudflare R2 · SSE-S3 at rest · tenant-prefixed keys · signed URLs only
Uploads	extension allowlist · magic-byte · macro block · size cap · audit-on-reject
Audit	tamper-evident rows on every admin / security event · 7-year retention capable
Backups	daily · 90-day rolling window
Support	support@ · same-business-day on production issues

For the complete control narrative and roadmap, see the ForgedOps Plans Security Whitepaper v1.0. For data-ownership specifics, see the Data Ownership Statement. Both documents are available from the public Trust Center at <https://forgedopsplans.com/trust>.

No fabricated certifications. No marketing fluff.

ForgedOps does not currently hold SOC 2, ISO 27001, FedRAMP, or HIPAA certification. Future certifications will be announced on the Trust Center as they are obtained.
